How to Load Entertainer Balloons

❶ Separate each color and place a rubberband approximately two inches from the neck of the balloon.

❷ Gather all of the balloon bundles and place them, neck down, through the loop of the Velcro® strap.

❸ Hold onto the end of the balloons, pull to cinch the Velcro® strap around the balloons.

❹ When you place the belt around your waist, the balloons will spill over the sides, allowing the user to easily select the desired balloon color.

Tips

- When loading your belt, place dark colors on one side, and light colors on the other so you can refer to them quickly while on the job.
- Dark colored balloons look very similar in the dark. To avoid confusion while twisting in a darker venue, choose a few dark colors to swap with light colors.
